

Reflections on the MIT Plan
for Climate Action

Maria T. Zuber
Vice President for Research

MITEI External Advisory Board
October 24, 2019

MIT's Climate Action Plan, 2015-19

- Low Carbon Energy Centers
- Summit Farms Solar Investment
- Arctic Warming Research
- New Minor in Sustainability
- New Web-based Climate Primer
- Central Utility Plant Upgrade
- Climate Scenarios Workshop & Paper
- Northeast Climate Change Engagement
- “Today I Learned” Climate Podcasts
- Institute-wide Climate Symposia Series
and much more...

Global Warming of 1.5°C

An IPCC special report on the impacts of global warming of 1.5°C above pre-industrial levels and related global greenhouse gas emission pathways, in the context of strengthening the global response to the threat of climate change, sustainable development, and efforts to eradicate poverty.

Fourth National Climate Assessment

Volume II

Impacts, Risks, and Adaptation in the United States
